PROJECTS

Uber Backend Project

[Github Link](#)

Developed a scalable Spring Boot microservices platform with Eureka for service discovery and real-time driver-client tracking using Redis and WebSocket.

Implemented JWT authentication and inter-service communication with Kafka and Retrofit, and built modular booking, review, and driver services using Spring Security, JPA, and REST APIs.

Vehicle Detection & Speed Estimation

[Demo Link](#)

Developed a system to detect vehicles in video streams, track them across frames, and estimate real-time speed. Implemented using Python, OpenCV, YOLOv11 for object detection, SORT for object tracking, and NumPy for speed calculation.

Document Q&A Chatbot

[Demo Link](#)

Built a RAG-based system using LangChain, FAISS, Groq LLMs and HuggingFace embeddings to enable accurate, context-aware question answering over PDF documents. Designed a clean UI using Streamlit

App Builder - AI Agent

[Github Link](#)

Developed an AI-powered application builder agent using LangGraph, LangChain, and Groq LLMs, enabling end-to-end project generation from natural language inputs. Implemented planner, architect, and coder workflows to automate structured application development.

EDUCATION

2023 - 2027 Bachelor's Degree in **CSE** at **The Maharaja Sayajirao University**

SKILLS

Languages	C++, Java, JavaScript, SQL, Python, HTML5
Fundamentals	OOPs, DSA, DBMS, Computer Network, Operating System
Technologies/Frameworks	CSS, Spring Boot, Spring Microservices, Spring Security, NumPy, Pandas, Machine Learning, Deep Learning, OpenCV, NLP, GenAI, RAG, Agentic AI

CODING PLATFORMS

Solved 800+ Problems on LeetCode

Solved 100+ Problems across platforms like GeeksforGeeks, Atcoder, Codeforces, Cses

CERTIFICATIONS

Mastering Data Structures and Algorithms – PW Skills

Feb 2024 – Dec 2024

SQL: From Zero to Hero – Udemy

Jan 2025

Software Engineering Job Simulation – JPMorgan Chase & Co.

Aug 2025
